Book: Human Biology (Wakim & Grewal)

Human biology is an interdisciplinary area of study that examines humans through the influences and interplay of many diverse fields such as genetics, evolution, physiology, anatomy, epidemiology, anthropology, ecology, nutrition, population genetics, and sociocultural influences; it is closely related to physical anthropology.

- Front Matter
- 1: The Nature and Process of Science
6: DNA and Protein Synthesis

7: Cell Reproduction

8: Inheritance

9: Biological Evolution
10: Introduction to the Human Body

11: Nervous System

12: Endocrine System

13: Integumentary System
22: Reproductive System

23: Human Growth and Development

24: Ecology
