2: How We See the Invisible World

3: The Cell

4: Prokaryotic Diversity

5: The Eukaryotes of Microbiology
6: Acellular Pathogens

7: Microbial Metabolism

8: Microbial Growth

9: Mechanisms of Microbial Genetics
10: Modern Applications of Microbial Genetics

• 11: Innate Nonspecific Host Defenses

• 12: Specific Adaptive Host Defenses

• 13: Diseases of the Immune System
14: Microbial Mechanisms of Pathogenicity

• 15: Disease and Epidemiology

• 16: Control of Microbial Growth

• 17: Antimicrobial Drugs
18: Bacterial Pathogens and Diseases

19: Eukaryotic Pathogens and Diseases

20: Acellular Pathogens and Diseases
21: Appendix A - Biochemistry Review

• 22: Appendix B - Molecular Genetics Review

• 23: Appendix C - Human Anatomy
