2. How We See the Invisible World

3. The Cell

- Bacteria
- Archaea

Phylogenetic Tree

4. Prokaryotic Diversity

5. The Eukaryotes of Microbiology
6: Acellular Pathogens

7: Microbial Metabolism

8: Microbial Growth

9: Mechanisms of Microbial Genetics
10: Modern Applications of Microbial Genetics

11: Innate Nonspecific Host Defenses

12: Specific Adaptive Host Defenses

13: Diseases of the Immune System
14: Microbial Mechanisms of Pathogenicity

15: Disease and Epidemiology

16: Control of Microbial Growth

17: Antimicrobial Drugs
18: Bacterial Pathogens and Diseases

19: Eukaryotic Pathogens and Diseases

20: Acellular Pathogens and Diseases
21: Appendix A - Biochemistry Review

22: Appendix B - Molecular Genetics Review

23: Appendix C - Human Anatomy
