Book: Microbiology (Boundless)

- Front Matter

- 1: Introduction to Microbiology
2: Chemistry

3: Microscopy

4: Cell Structure of Bacteria, Archaea, and Eukaryotes

5: Microbial Metabolism
6: Culturing Microorganisms

7: Microbial Genetics

8: Microbial Evolution, Phylogeny, and Diversity

9: Viruses
10: Epidemiology

11: Immunology

12: Immunology Applications

13: Antimicrobial Drugs
14: Pathogenicity

• 15: Diseases

• 16: Microbial Ecology

• 17: Industrial Microbiology
Thumbnail: Campylobacter bacteria are the number-one cause of bacterial food-related gastrointestinal illness in the United States. (Public Domain; De Wood, Pooley from Agricultural Research Service).
